News From Your TOWN HALL

The Town Commissioners haven't gotten together yet about an engineer for the addition and new building of the water works.

The Water Commissioner has a firm of engineers and chemists whom he has recommended to the Commission, but the other members aren't sold on his firm, and haven't made up their minds to allow the water works commissioner to run his department.

A representative of a second engineering firm whose showing professionally is excellent, and who are, undoubtedly qualified to handle the entire matter, but they are a little late with their efforts.

Any new firm—that is other than the ones Mr. Risk recommends—must spend 90 days to six months gathering the information and making the survey which has already cost the Town \$1500 and must naturally charge for it, thus delaying the commencement of work on the water works.

There's no difference in fees, as they are all set by a schedule to which all members of the several engineering and architectural societies have subscribed. Amounts and methods of payment are universal.

There can be only one question, and that is professional ability, and that is easily determined by investigation of references and studying past performances.

In the meantime the public is anxious that no more time be wasted in bickering and dickering than is absolutely necessary. The sooner the question is settled, the better the public will feel towards everyone.

Ration Board Ready To Enforce Prices But No Price Panel

Mrs. Imogene Postaine, General Factotum of the local Ration Board has been attempting for several months to secure a Price Panel, such as is in vogue in most boards, and such as is helped by the higher ups, but so far, no Soap.

Several times she has come near it, but each time the set-up just melts away when the prospective candidates see the job.

It is acknowledged that anyone volunteering for such a position is a self-confessed and publicly acknowledged, nos-grained, male twisted, and so on, generally speaking, but something has to do the job if the community doesn't want to allow rampant price violations to be the board. Price control is as much desirable when the manufacturer is allowed to refuse to furnish goods as when the consumer is asked to undertake this job, Mrs. Postaine will be pleased, and you will have done a good community job.

If some bright somebody—dumb one for that matter—will come forward with a plan to entice three or more persons to undertake this job, Mrs. Postaine will be pleased, and you will have done a good community job.

Mrs. Murphy Resigns As Cafeteria Manager

At a call meeting of the PTA executive board Wednesday morning, the resignation of Mrs. Mike Murphy as manager of the school cafeteria was accepted with regret. The vacancy will be filled immediately.

The board voted unanimously to stop all driving beyond the posts along the edge of the school campus, and chains will be put up to prevent any traffic from entering the grounds. Although strong appeals for careful driving have been made to mothers who drive into the yard to get their own children, the practice of reckless and inconsiderate driving has continued.

Alcohol Beverage Will Have Office

H. E. Beasch, of the State Alcohol Beverage Department, is operating an office in the court house in West Palm Beach and will be available at all times for applications for any business of the Alcohol Beverage Department.

Football Squad Working Hard

The High School football team has been working hard to get in good condition and learn the new system of play. A trip was made to West Palm Beach on Thursday night to scrimmage the Palm Beach High school under lights. The entire team went on the trip.

Much enthusiasm has been shown among the boys and they are fighting hard for a position on the starting team. Several new faces are seen on the squad this year. Some of these have weight but lack experience.

It is expected that the average weight will be 150 pounds and the boys give promise of being in fine shape for the opening game with Stewart on the 29th.

Season tickets will be on sale shortly. Student tickets will be \$1.50 and adults \$3.00.

The following is a list of the players on the local squad: J. G. Goggin, Francis Helms, Billy Jeffries, Ray Kent, Elmer Kirchman, Herbert Lloyd, Wallace Lutz, Bob Matthews, Carroll McDonald, Richard Pike, B. Q. Waddell, George Wedgeworth, Joe Cherry, Horace Harris, Billy Eggleston, Jewel Bass, Robert Newman and Billy Beardon.

Mike And The Mrs. Have Bought Out Jim's Drug Store

Mr. and Mrs. Mike Murphy have bought Jim's drug emporium and have already taken over the active management.

They are exercising the possessive attitude.

Mike has been the manager of the Darden Pharmacy for a number of years and has built it from an indifferent beginning financially to a money maker.

The headquarters of all "bench farmers" will not be disturbed, and the phone service for wives who are looking for late-meals husbands will be still a feature.

It is said that there is more business transacted in his front business than in the general vicinity of Darden's—excuse us it's Murphy's—shop in any business office in town.

Mrs. Murphy has resigned as manager of the school cafeteria where she has been since its inception, and will assist Mike in the store. She hasn't been accustomed to a knife that "egg shell" thickness of meat at the school, and the knowing and experienced touch of a woman who has found a successful proprietorship in the drink and lunch counter.

EDD Debt Reduced To 4 1/2 Millions And Low Interest Rate

With the validation decree of Judge White just announced, the re-funding of the Everglades Drainage Debt is an accomplished fact.

By paying off \$800,000 out of accumulated funds, and getting the interest rate at 3.33, and thus greatly reducing the yearly carrying charges, together with a valuable feature, it is possible to pay off the entire debt in 16 years at the present tax rate.

Mr. Jesse Jones' RFC decided to give up the 4 per cent bonds, but an option clause allowed private capital to take over at less than the RFC rate.

Judge White questioned the propriety of having a half million reserve set aside, but when it was explained that this is for a cushion to take up the slow rate of payments in bad years, he allowed this item read.

This completes the return to vigorous health the financial condition of all drainage units in the Glades, and indicates unimpeded ability to healthily finance farms over long periods as in other areas.

Paper Collection Saturday
The second collection of waste paper will be made on Saturday, September 24th by local Boy Scouts and everyone is urged to have paper in bundles at a convenient place where the Scouts can pick it up quickly.

Scoutmaster Frank Miller is appealing to the public to co-operate with the Scouts and proceeds from the sale of all paper salvaged will be added to the fund and will also be given to the Government in its drive for paper.

They're Looking For Those Christmas Boxes

You Have Til October 15th To Mail Overseas Packages

These are the rules:
The parcel must not exceed five pounds, and must not be more than 15 inches in length or 36 inches in length and girth combined.
It should be marked "Christmas parcel" so that it may be given special attention to assure its arrival before December 25.

Not more than one parcel may be mailed in any one week to the same member of the armed forces by or in behalf of the same mailer.

When combination packages are made up of such items as miscellaneous toilet articles, hard candies, soaps, etc., the contents should be tightly packed so that they will not become loosened in transit and damage the contents or the cover. Hard candies, nuts, car-

mels (including those covered with chocolate), fruit cake, cookies and chocolate bars individually wrapped in waxed paper should be enclosed in inner boxes of wood, metal or cardboard.

Perishable goods such as fruits and vegetables that may spoil are prohibited. Inflammable, infectious materials such as matches or lighter fluids, poisons, and anything that may damage other mail also are prohibited. Gifts enclosed in glass should be substantially packed to avoid breakage. Sharp instruments, such as razors and knives, must have their edges and points protected so that they cannot cut through the coverings and injure postal personnel or damage other packages.

Approved re-funding of the Everglades Drainage bonded indebtedness and reduction to four and a half million, gave credence to the fact that the Glades is fast reaching that stability long sought.

Some who are in need of the long time low interest rate farm financing have almost given up in despair about the Columbia Land Bank loans because the dis-puta bonded indebtedness was subject to deduction from the allowable 50 per cent appraisal and an unrequitable appraisal at that.

Recently Mr. Drew, accompanied by appraisers and investigators has made several trips

to the Glades, and thru his studies and recommendations more liberal appraisals and conditions of loans have resulted.

Appraisers may be made to of course newly established migratory camps had improved the living standard of some of these people to great extent and the camp clinics were aiding some in the health problems, but they were inadequate to cope with the tremendous demands and the health conditions among this class was appalling.

And then, of course a modern hospital such as we were to get, would be a definite asset to any town, and Belle Glade was no exception.

(Continued on page 5)

Muck Lands Eligible For Land Bank Loans

Mr. George F. Drew, Assistant Secretary of the Land Bank at Columbia, S. C., announced here Tuesday that after appraisal and investigations by the engineering department and appraisers of the Bank, favorable action has been taken on the territory around the south and west side of Lake Okechobee for eligibility for loans.

Coming along with the announcement that the Courts have approved the re-funding of the Everglades Drainage bonded indebtedness and reduction to four and a half million, gave credence to the fact that the Glades is fast reaching that stability long sought.

Some who are in need of the long time low interest rate farm financing have almost given up in despair about the Columbia Land Bank loans because the dis-puta bonded indebtedness was subject to deduction from the allowable 50 per cent appraisal and an unrequitable appraisal at that.

Recently Mr. Drew, accompanied by appraisers and investigators has made several trips to the Glades, and thru his studies and recommendations more liberal appraisals and conditions of loans have resulted.

Diversification Shown In Ten Year Comparison Of Vegetable Movement

Farmer Boys Whip City Slickers At Rich Man's Game Of Golf Locally

A team of eight West Palm Beach Rotarians took it on the chin at the Country Club of the Everglades Friday afternoon from a similar team of local club members.

Of the four teams, three were roundly outscored and the fourth was held for downs and no score, giving the local boys a handsome lead over the visitors.

Hitecock and Huck Taylor "took" the low scores of the WFB team, Al Neilson and Jack Fairchild with a 76 and a 77 against an 80 and an 82.

Lou Betner and Casper Van Landingham romped with E. D. Anthony and H. H. Hampton, while Harold Rabin and Arthur Wells beat Wm. Bland and Art Hamilton 2 to 1.

Luther Jones and John Harris broke even with J. J. Cater and Precher Atkins.

In individual play the local boys gathered 15 1-2 points to the visitors 8 1-2.

An invitation to continue the match on the sand course at Biscayne at the first opportunity.

Four Items Show Total Gain Equal To Total Loss

Two vegetables have been dropped entirely from our list shipments and two drastically reduced in volume during the past ten years of farm operation in the Glades with a total loss of 733 cars; twelve items have been added to the list with a gain of 217 cars; four vegetables have been increased in shipped volume for a total gain of 3274 cars.

Celery has gone down 54 cars in 33-34 to 2633 in 43-44, potatoes from 53 in 33-34 to 744 in 43-44, cabbage from 355 to 1695, while mixed vegetables have risen from 379 cars for the 33-34 season to 1020 for the past season.

The bean has gained 50 per cent, and a greater part of this has been from canning purposes, and still the bean is only 45 per cent in volume of the total movement from the Lake area.

In 1933-34 season there were a total of 6098 cars leaving the Lake region of Palm Beach county, of which 4383 were beans, which was 65 per cent of the total shipment. In 1943-44 there were 6700 cars of beans which was about 45 per cent of the total.

Interesting speculation is in order concerning the two vegetables (beans)—canned and dandelion. There is a current explanation for both. Cucumbers do not grow successfully in the muck, because of the rapid growth of the vine when the fruit is small thereby either straggling or young or badly injuring them. Pup Lord was growing the dandelion assisted by a yankee from Maine and both have other interests now.

Tomatoes have practically disappeared as have peas, because other crops could be bettered with less troubles and uncertainties.

Diversification is clearly shown in the progress made but there are still two items of diversification in the Glades not shown in this list. Cattle fattening and Ramey—cattle fattening is just on the verge of a major increase and development which will add tremendously to the stability of the Glades farmer.

Ramey is being produced, and is being sold and experimented with by a score of individuals and corporations.

The solving of the commercially profitable problem of Ramey is just around the corner as a matter of fact it is peeping into the light now. Some of the major financial institutions of the country are earnestly trying to solve it, and American ingenuity will not be balked in this.

The following is a comparative list of shipments in the Glades 10 years ago and 33-34.

	33-34	43-44
Beans	4368	6707
Beets	0	4
Cabbage	355	1695
Carrots	0	10
Celery	54	2633
Chicory	0	38
Chinese Cabbage	0	8
Collards	0	5
Corn	5	8
Dandelion	3	0
Eggplant	3	40
Endive	0	23
Garlic	20	230
Lettuce	0	11
Mixed Vegetables	379	1020
Onions	0	4
Peppers	615	145
Potatoes	53	744
Radishes	0	105
Romaine	0	4
Squash	0	1
Tomatoes	230	10
Cucumbers	1	0

Vegetable Committee Getting In High

Hundreds of Florida vegetable growers, especially producers of snap beans and cucumbers, have executed their power of attorney authorizing the Florida Vegetable Committee to protect in their behalf the October ceiling prices on cukes and snaps on the basis that they are illegal, according to LaMonte Gray, Committee manager at Orlando. The Committee contends that OPA failed to comply with the provision of the new OPA law requiring 15 days advance notice of ceilings prior to planning time.

In the Wauchula area alone more than 250 growers not only authorized FVC to act for them, but held a meeting and passed a resolution unanimously declaring that the October ceilings on cucumbers and snap beans are (Continued On Page 6)

Wage Rate Conditions Subject Of Hearing

Red Mounts is calling a hearing on behalf of the War Food Administration and the Extension Service at the City Hall, Friday, September 29th at 2 p. m.

As those farmers who sign contracts for labor must agree to pay the prevailing wage, this meeting is for the purpose of finding out what the prevailing wage is, and not to set a wage.

Every farmer who is interested is asked to get a wage information for the records.

Local Banker Goes To Convention

Milton Campbell, Vice President of the Florida National Bank at Belle Glade, will be in Chicago, where he will attend the convention of the American Bankers Association for ten days.

Among the important items to be discussed will be the workings of the loan feature of the G. I. Bill of Rights, which the bank believes will be important in this farming section to returning soldiers.

SERVICE MEN who FIGHT and WRITE

is serving in the south Pacific with the Navy.

GEO. EGGLESTON WT 3 c. The following letter to his mother, received from New Guinea, but according to a more recent letter to his mother, Mrs. W. M. Eggleston, George is believed to be in the Philippines.

"Still in the jungles of New Guinea, but have high hopes for the next move. Its really summer here. Can cook on the front burner without gas now, for its been 140 degrees for the past four days.

"We don't have much rain or much heat, but plenty of dust. Its important to us to have it dry so that everything will stick. Have a nice place for our camp and our chow house is one of the best on the island. We have very good chow most of the time. Once a week we have cream and cake and have a service open so we can get a few extra things. Everything is rationed out like rice, cigarettes, cigars, candy, cokes and beer. We have one electric light in each tent, but are well

hidden from the air by tall mangrovy and teakwood trees. Most of them are over 100 feet tall and the mountains and hills are covered with them. The swamps have him and rubber trees. Its really beautiful country and the air strips with all the Jap planes destroyed and piled up on them make still a more beautiful picture. The Japs got the hell kicked out of them here."

CORPORALS FRANCIS MORRIS and L. V. McMillan "To our friends in the Glades: We would like to apologize for not thanking you for the Herald's important to us to have it dry so that everything will stick. Have a nice place for our camp and our chow house is one of the best on the island. We have very good chow most of the time. Once a week we have cream and cake and have a service open so we can get a few extra things. Everything is rationed out like rice, cigarettes, cigars, candy, cokes and beer. Be Not Afraid
Be not afraid of life. Believe that life is worth living, and your belief will help create the fact—"The Will to Believe." William James.

As we were walking past the Treasury toward the White House, one of the correspondents was telling that story concerning the indutree about to be fingerprinted.

"Wash your hands" commanded the sergeant.
"Both of them?" asked the I.
The S. started to reply, then paused a moment.
"No," he finally answered, "just one. I want to see how you do it."

It Happened in New York

We are sorry that we haven't his name or number or even the number of his cross-town street; the black New York reporter was probably just too flabbergasted by what he saw to make proper notes. But the motorman who halted his thoughtful train on busy Forty-second Street, just west of busier Fifth Avenue, the other day, got off and escorted a passenger across the thoroughfare to a newsstand at the subway entrance deserves special mention. He probably was just the same good-hearted kind of fellow as that San Francisco cable-car grippian whom Barry Fitzgerald portrays in the movie, "I Love a Soldier"—always stopping in traffic to do a friend a favor.

Bernard Rush, newsdealer at the corner, was the passenger. He doesn't know the motorman's name either, and couldn't identify him for the reporter who observed the incident. All Mr. Rush knows is that he is a kindly fellow, who is gentle for all the strength in his brawny hands. The fact is that he has never seen his benefactor; for Mr. Rush, you see, is blind.

Negro Educator Seeks

As so much is being said within and without about the race problem in the South, and as I was born and reared in the South, and being a colored man, I feel justified in expressing my views about the race problem as I see it.

In my travels in Arkansas and the South, I am convinced that the race problem is not so acute as many would have it.

I am opposed to anyone, colored or white, of North or South, at all times exposing the bad side of and neglecting to say anything about the brighter side of race relationship. I do not believe the welfare of the two races should be left in the hands of the radicals.

After all is said and done, until the Southern white people and the Southern Negro people seek to adjust their misunderstandings and solve their own problems, our relationship will not be what it should be. I do not believe people living two or three thousand miles away are in a position to solve local problems as we ourselves are.

Whether we believe, or whether we like it, statistics will prove that the colored people of the South own more property, operate more business, own more farms, and have better educational institutions than those of any section of the United States.

Let us all say more about the better and more substantial contributions that both of us have contributed to our beloved South and it will do much to help solve our race problem.—Floyd Brown, President, Fargo Agricultural School, Fargo, Ark., in a letter to the Arkansas Democrat, Little Rock.

Full Speed Where?

Radaman Joe Wilson, Jr., child of reaching a class at Colgate ten minutes late, said, "You see, sir, I was in Africa yesterday." It foreshadows the travel habits of civilians in the near future. Yet what we need is not so much to move faster, but to think faster.

In a world which feeds us New England clam chowder for dinner, and bouillabaisse for the next day's luncheon, mental activity will need to be much more nimble than before.

Voyaging abroad used to permit us anywhere from a week to two months to adjust ourselves, gradually, to the exotic scene; to prepare ourselves for customs which might startle, for ideas which we could not share. And even then our mental processes lagged behind the physical transition. Delay in meeting the Nazi challenge was first a mental hesitation, a reluctance to set the machinery of the mind in motion.

The paradox of mechanical wonders and medieval torture in the same "civilized" area means that thinking on the part of the average person has not kept pace with invention. Gangster use of modern machinery, either by individuals or nations, shows the basic need to be a mental one. Nothing travels wider. Let us, on the eve of the next peace, pledge ourselves to faster and better thinking.

New Opportunities

Our nation has long enjoyed superior distribution of its domestic products to consumers. It is not distant future, it will enjoy a similar distribution of world products. That this is no idle dream is evidenced by the announcement of lowest commercial air service designed to expand postwar international

THE POCKETBOOK OF KNOWLEDGE

trade and tourist travel. One line has already announced passenger fares to compete with steamships and has made drastic cuts on cargo rates.

To gain some idea of the potential international cargo business, it is interesting to note that domestic air express totalled 48,689 shipments in July, an increase of 16.7 per cent over July 1943, according to the Railway Express Agency. This is a foretaste of the volume that will develop with expanded international trade. Combination air and rail express service for the shipping public is accomplished through the co-ordination of schedules which link the 350 airport cities in the United States and Canada with the 23,000 off-air line offices of the Railway Express Agency.

With the coming postwar aviation program, imagined avenues of trade will be blazed to every corner of the world. Our distribution system is now being coordinated to render a service never before dreamed of. Thousands of new jobs will come into being along with thousands of new opportunities for advancement.

American enterprise is ready and waiting for the starting signal.

CINEMATIC CHATTER

By Malcolm Miller
With the Sunday-Monday screening comes two more in thrills and adventure. This picture is "Passage to Marseille," and the two stars are Humphrey Bogart and Sidney Greenstreet. Supporting them are lovely Michèle Morgan, Helmut Dantine and many others.

This is a French war drama. A group of escaped Devil's Island convicts are picked up by a ship planning to run the blockade and occupied France with supplies wanted by the conquerors. There is a munity, the convicts take over the ship and succeed in making the run to England. It is adventurous, exciting and, in fact, it is breath-taking throughout.

Tuesday - Wednesday brings Richard Dix with Gloria Stewart. J. Carroll Naughton, supporting cast in another series of the "Crime Doctor" which is packed with action and thrills.

THE OLD JUDGE SAYS...

"Yes, I'm afraid there's no denyin' it, Judge... jeeps and trucks and other kinds of motorized equipment have taken the place of the good old horse in modern warfare."
"It's true of lots of things in this war. Even. Every day we hear of new tactics and requirements and new uses of products. For instance, take the alcohol that is used for fuel. It's a matter of fact, didn't it, Judge? That's a mighty important war contribution that had escaped me completely."

ing. To some these show and I'm sure these folks will be well entertained in this present subject. Saturday brings Dick Foran back to the screen in a fine Western picture under the title "Empty Holes," which is an unusual story of the old West when the law was in the muzzle of a six gun.

BIBLE QUESTIONS ANSWERED BY THE VOICE OF PROPHECY

Question—I worry about the battle of Armageddon. Will there be safety for anyone at that time?
Answer—God's children need never fear. They are always safe in His care. For encouragement, read Psalm 91-96, and notice especially verse 41: "He shall cover thee with His feathers, and under His wings shalt thou trust: His truth shall be thy shield and buckler. Thou shalt not be afraid for the terror by night; nor for the pestilence that walketh in darkness; nor for the destruction that wasteth at noonday. A thousand shall fall at thy side, and ten thousand at thy right hand; but it shall not come nigh thee. Only with thine eyes shalt thou behold and see the reward of the wicked. Because thou hast made the Lord, which is thy refuge, even the most High, thy habitation; there shall no evil befall thee, neither shall any plague come nigh thy dwelling. For he shall give His angels charge over thee, to keep thee in all thy ways." It would be good to memorize this Psalm. The forty-sixth Psalm also was written for the time of trouble.

Q—Please explain Hebrews 12:9. Furthermore we have had fathers of our flesh which corrected us, and we gave them reverence; shall we not much rather be in subjection unto the Father of spirits, and live?

A—If your father was like mine, he believed in the laying on of hands once in a while! Earthly fathers correct their children for their own good, and the children respect and honor them for it. So also, the heavenly Father must sometimes correct us, but this only proves that we are His sons and the objects of His care. For "God dealth with you as with sons; for what son is he whom the father chasteneth not?" (Verse 7.)

Q—What was the origin of the people in the land of Nod, where Cain was married?

A—The Bible does not say that Cain was married in the land of Nod. Read Genesis 4:16, 17 carefully. If there were any people there before Cain arrived, they were also the descendants of Adam and Eve, because Eve "was the mother of all living." (Genesis 3:20) The word "Nod" means separation, and so doubt recite the sad fact that Cain removed from the presence of the Lord, near the gate of Eden, to this land of Nod, or separation. It may have been uninhabited until he and his family arrived.

Q—Is the Golden Rule really in the Bible?

A—It is found in Matthew 7:12: "Therefore all things whatsoever ye would that men should do to you, do ye even so to them: for this is the law and the prophets."

Ed. Note: Address your questions to the BIBLE QUESTION CO., 1214, The Voice of Prophecy, Box 55, Los Angeles 20, Calif. Bible questions of 200 or more words will be answered in this column at space permits.

Baking the "Duck"

Under the drying heat of this battery of infra-red lamps, "baked duck" is prepared in a Chevrolet plant, the "duck" being the new amphibian truck now being produced by this General Motors division in its St. Louis (Mo.) assembly plant. This "oven" dries the olive-drab finish of the vehicle in 4 1/2 minutes, a job that normally would require nearly 1 1/2 hours for proper setting of the paint. As subcontractor for G.M.C. Truck & Coach division, Chevrolet is in volume production on the new vehicle, a high-priority item on the Army's landing craft production program.

FIGHT AND WRITE

(Continued from page one) over a barren, dry, dusty and useless desert, we begin the trek northward. Heat that sears your very soul, dust as fine as ground glass, and a glare that makes mirages common, constitutes but a small discomfort, though, for the hairpin curves. Mountains that rise high, past dangerous tribal groups, over night, and slumbers, hoping to awaken again. Put a hand, where a mistake will drop

a man, truck and cargo thousands of feet into oblivion. Washboard surfaces that wreck the human body, hidden rocks that constantly menace, but on we go. A slightly more human section offers respite. Here for a change fertile ground is seen, green grass, some trees, then going over some logged passes. Drifts 12 feet high, past dangerous tribal groups, over night, and slumbers, hoping to awaken again. Put a hand, where a mistake will drop

rest. Yes, rest for one night and then begin again the long dreary and body breaking trip back. "Shall we go on? How would you like to sleep in temperatures reaching 170 degrees under dust stained, stifling mosquito bars. Or would you rather work nights with millions of sand flies carrying fevers, malaria mosquitoes that give no warning, crawling insects on every foot of earth. "Let's have some fun when work is done. Movies are available almost nightly; pictures that have been seen three times, or to the PX and sweat a fine out a mile long for candy, cookies and cigarettes, all rationed. Let's eat canned food and drink chlorinated water. It's not safe to eat in town. Diarrhea and dysentery run rampant; venereal diseased natives under foot, stagnant, stomach turning odors. "Try drinking three gallons of water daily and urinate twice. Try taking 6 to 9 salt tablets daily. Try the sun, the heat, the bugs, and try staying alive. When you've tried them all, you've conquered Iran."

Extension Service Plans Farming Aid To Returning Vets

Gainesville, Fla.—The Florida Agricultural Extension Service, through its crops of county farm and home demonstration agents, is making plans to render every possible assistance to returning veterans who wish to engage in agriculture. This was stated today by A. P. Spencer, director. Present plans contemplate the establishment of veterans' advisory committees in all principal agricultural counties. These would be composed of leading farmers, named by county

LITTLE THINGS...about the stars

By GEORGE LILLEY

NEW YORK, N. Y.—Richest of the big-name handliners are reported to be Fred Waring and Horace Heidt. Rumors go on about them. Fred Waring, the Omaha-born brother and Tommy Dorsey. Heidt is said to have more than doubled a six-figure earnings from the stand in real estate and a string of ballrooms he owns on the West Coast. Waring, starting from scratch, in his early 40's, a millionaire. Out of a love for tinkering he picked up a young fortune on the side with the invention of an electric cocktail mixer now on most bars.

Once radio to Waring was a penny-ante business. But not any more. Reprising September 2, it should net him weekly \$5,000 clear for a half-hour show at his old time over the Blue network.

SUCCESSFUL DO-LITTLE

None has been so successful in the air with such simple microphone as Cecil B. (the B for Blount) DeMille and Major Edna Bowes. Both admit to little microphone talent. Their trick is to introduce the talent of others. DeMille has been going on for 10 years with no end in sight. DeMille's latest dramatic show with movie stars resumes its 10th year on CBS September 4.

HURDLED HANDICAPS

Not long ago William L. Shirer, Sunday evening commentator on CBS, told friends he was the "most frightened man in the world." Several years ago in Europe he lost one eye. Recently the other eye began to fail and Shirer submitted to a doubtful operation. Last week Shirer, jittery and ill, pronounced the operation a complete success. A number of personalities in radio overcome physical handicaps to reach stardom. Quinlan, or Bob Hawk, suffered a spinal injury that doctors feared would bed him permanently. The talented Alvin Karpis was once overcome the loss of a foot. Connee Boswell fought to the top after severe infantile paralysis.

VERY LITTLE THINGS. Joe Kelly, who decides staggering problems on the Quiz Kids' grade, never went beyond third grade. Joseph Anthony, who really solves other people's domestic problems on the "Good Will Hour," got the idea for the show back allometry. "The Judge" for which radio broadcast is meaningful. Winchell refuses to let a professional operator make sense out of it because, he says, "it does." Biggest man in radio, 280 pound Michael Rogers, in the "Spotlight Band" program over the Blue network. Jack Benny and Walter Winchell are his friends. David Ross, Marine band leader, spends Saturday afternoons reading-while riding back and forth on the Staten Island ferry. Band leaders are easy does it. They are, in order, are movie actors, newspaper editors, garage owners and college professors, according to Roy Crosby, who looks into such things.

he needs... YOU!

As a Medical Technician in an ARMY HOSPITAL

Join this vital new branch of the Army! You'll be working directly with wounded soldiers, restoring shattered bodies and minds... teaching injured men new crafts, helping them become readjusted. The results of your work will be real and tangible... you'll be doing a job that needs desperately to be done; you'll prepare yourself a good postwar future. If you have training in, an aptitude or a desire for hospital work, the Army needs you for the technical positions listed below. Only a high school education required. You are needed NOW!

- Ophthalmologist
- Surgical Technician
- Medical Stenographer
- Lip Reading Technician
- Pharmacist
- Orthopedic Technician
- Laboratory Technician
- Occupational Therapist
- Educational Reconditioning Expert, Dental Technician
- X-ray Technician
- Braille Technician
- Hearing Aid Technician
- Psychiatric Social Worker

Here's what this training will do for You— You'll be given a six weeks Basic Training Course, then assigned directly to medical work or to further training at an Army Medical Center. Your earnings are your own... for dates, dancing, visits to the PX... forming a good balance of duty and pleasure!

For further information inquire at the Army Recruiting Office, Second Floor, Post Office Building, Jacksonville. JAX BREWING COMPANY, Jacksonville, Fla.

Distributed by SHELLY CONNELL, Belle Glade

Transportation is over-taxed

Frankly, the transportation situation is serious. Buses are overcrowded—working untold hardships and discomforts to all. Yet thousands daily ignore the gravity of the travel problem to make needless, unessential trips... trips for pleasure alone. So important is the need to conserve space for those who must travel to meet the demands of war, that Florida Motor Lines urgently asks YOU to postpone pleasure travel until the war is won. We have an abiding faith in the loyalty and understanding of our riders. We believe that when they realize our task as prime movers of men and women to war jobs—fighters on well-deserved furloughs—millions of people on trips essential to Victory—they will do all that is expected of them.

* WHEN YOU TRAVEL... Be sure to get identification stickers or tags on your baggage to avoid delay or loss. **FLORIDA MOTOR LINES**

WHY DON'T YOU TRY IT? Get it at your drug store, Effervescent Tablets 50¢ and 75¢, Liquid 25¢ and \$1.00. Read directions and use only as directed.

Home Canners Advised How to Avoid Deadly Botulinus Poisoning

THERE is vital need to use as many vegetables as possible as well as fruit; but the only safe way to eat any vegetables, except tomatoes, is by correct use of the pressure cooker," advises Katherine Fisher, Director of Good Housekeeping Institute. "This method is the only one which provides the hotter-than-boiling heat that's necessary to kill botulinus germs which may be on any non-acid food vegetable—and that means all vegetables except tomatoes. When botulinus germs are not killed in the canning process, they thrive in sealed jars and create a powerful poison. "This botulinus poisoning comes from bacteria that live in the soil and cling to vegetables. Although rare, this poison is particularly dangerous because it usually does not change the food's appearance, odor or taste. Analyses of soil indicate that there is a chance that botulinus germs may be found almost anywhere. Fortunately, they are harmless until they get in air-tight jars of canned food or liquids, with whom is no variegation, neither shadow of turning. "Among the citations which comprise the Lesson-Sermon is the following from the Bible: "In the beginning was the Word, and the Word was with God, and the Word was God. All things were made by him; and without him was not anything made that was made." "Correct use of the pressure cooker also protects against other types of spoilage," Miss Fisher said. "A recent national survey showed that vegetables by the hot water bath method reported a hundred per cent greater rate of spoilage than those who used the pressure cooker method. "Never strive to discover spoilage," Good Housekeeping advises. "All home canned products should be examined carefully when opened, and if there is any evidence of spoilage, the food should not be used."

We're sending in our card!

Time to Think!

Florida's amazing transition from the quiet of farms and groves into the world's winter playground, back of which grew a vast agricultural empire, has excited the admiration of the continent and contributed to a growth unequalled in the nation. Equally amazing was the manner in which she became an armed camp almost overnight, as whole new cities were built to meet the expanding aerial requirements of the armed services, the natural hub of the continent, because in truth, the aerial gateway to the world as she stepped out onto the threshold of her industrial future. Florida, because of her strategic location for world trade, her invulnerable year-round climate, her abundance and variety of raw materials and labor, her vast resources of dependable power service under progressive business management, and her strategic location, is essential to a successful industrial future. To the Lands of Promise to the south—where potential post-war markets are unequalled—point the airways and palm-bordered highways of Florida. Cuba, the West Indies, South America, Africa, will be the launching new markets of the post-war era. The gateway to them is Florida—the crossroads of the air-supplemented by adequate rail and water transportation facilities. It's time to think of Florida for your future. • Assembly Plant • Display Rooms • Warehouses We invite your investigation of Florida's opportunities and cordially extend to you our consulting services of our entire staff. **FLORIDA PORTLAND CEMENT COMPANY MIAMI 20, FLORIDA**

Woodmen need no "distress signal" — they are always on the alert, ready to bring aid and comfort to fellow members in times of sorrow or distress.

The Woodmen Society goes still farther in looking after the welfare of its members. At the beautiful Woodmen War Memorial Hospital at San Antonio, Texas, members who have become victims of tuberculosis are given the highest type of treatment free of cost to them. The large percentage of Woodmen patients restored to health and useful careers is a testimonial to the high quality of care they receive at their Society's splendid hospital.

Let the local Woodmen representative tell you how you, too, can protect your own and your family's future security with safe, sound, legal reserve Woodmen life insurance, and also enjoy all of the many "protection plus" benefits of Woodcraft.

VEGETABLE COMMITTEE
Continued from page 1
below cost of production. FVC is rushing preparation of cost data to combat proposed ceiling prices on other commodities to be used when Vegetable Committee and growers meet with OPA. Washington hearings prior to the effective dates of new ceilings.

Loring Road of Sarasota and E. G. Grimes, chairman and attorney, respectively, of the Florida Vegetable Committee, are at Dallas, Texas, this week conferring with Texas and California vegetable growers on price ceilings in general, as they affect commodities produced in the winter growing areas.

They will be joined in discussion by Frank Gindick, chief of the fresh fruit and vegetable section of OPA, and opportunity will be afforded to talk specifically about the October ceilings on cukes and snaps, which are being contested.

David B. Flambeau of Orlando has been employed as field representative of OPA, to work with LaMonte Gray in maintaining a closer contact with Florida vegetable growers and the problems of the vegetable industry. Flambeau will work out of FBC headquarters in Orlando.

Col. Noble Of S. Army
To Address Groups In Lake Worth and WPB

West Palm Beach, under the sponsorship of the United Council of Church Women in cooperation with the West Palm Beach Ministerial Association, Lt. Colonel William A. Noble of the Salvation Army will address a county-wide rally at the West Palm Beach Methodist church at 10:30 a. m., Thursday, September 28th to which the public is invited.

Next Tuesday noon, September 26th, Colonel Noble will address a joint meeting of service clubs at the Hotel George Washington, with the Rotarian Club acting as host, and the Kiwanis Club presenting the program. Wednesday night, the Lake Worth Rotary and Lions clubs will meet jointly at the Seminole hotel at 12:15 p. m. to hear him.

Business and professional men in the south end of the county have been invited.

On Tuesday, Wednesday and Thursday nights at 8 o'clock, Colonel Noble will conduct special missionary and evangelistic services at the Salvation Army Citadel, Gardenia and south Dixie Highway, to which the general public is invited.

A native of Eustis, Florida, Col. Noble is now on furlough from his duties as superintendent of the Salvation Army Catherine Booth Memorial hospital, Nagercoil, State of Travancore, India. He is a graduate of Emory University Medical School and is a fellow of the American College of Physicians and Surgeons. He saw service in France and with the army of occupation as a medical officer during the first world war.

Col. Noble holds the Kaiser-I-Hind medal for outstanding service in Italy.

MRS. MURPHY RESIGNS

(Continued from page one) and this seems to be the only way to prevent a serious accident.

Plans were made for the annual Teachers Reception to be held in the school auditorium on Thursday night, September 28th at 8:30 o'clock. The hostess committee includes Mrs. Curtis Thompson, Mrs. Richard Townsend, Mrs. Thomas Breger, Mrs. Milton Campbell, Mrs. Clyde Doolittle, Mrs. Kenneth Lutz and Mrs. James Ball. All fathers are especially urged to attend.

What You Buy With WAR BONDS

So long as a soldier can eat and think up disparaging names for his equipment the Army will do all right. Food is either "beans" or "chow."

"Chow" may consist of a well cooked meal or it circumstances demand our fighting men have learned to subsist on "Ration K," the concentrated food that all of them carry into battle.

With millions of men and women in the services it will require a lot of War Bond buying on our part to keep them happy.

U. S. Treasury Department
The adults play on a mission-ary play as a special feature of the Training Union at the Sun-

day night service of the South Bay Baptist church. Those taking parts were Mrs. Edwin Best, Jackie Mutchler, Ernest Robinson, Judith Weathers, Mrs. W. M. Jeffries, Mrs. H. C. Willis, Mrs. L. O. Ratley, Mrs. Yadie Vowell, Mrs. O. H. Martin, Mrs. S. M. McAllister, O. D. Martin, Ray Hardy, Mrs. Hartline and Mrs. W. C. Allen furnished the musical accompaniment.
